

REYNOARCH
Rizz

Let's Talk **ABOUT** *Our journey*

We are a forward-thinking organization committed to delivering high-quality products and reliable solutions that meet the evolving needs of our customers. Since our inception, we have focused on building a strong foundation based on trust, integrity, and consistent performance. Our team brings together experience, technical expertise, and a passion for excellence, enabling us to provide innovative and practical solutions across every project we undertake.

Customer satisfaction is at the heart of everything we do. We believe in understanding our clients' requirements thoroughly and offering customized services that add real value to their businesses. By combining advanced technology, efficient processes, and skilled professionals, we ensure timely delivery, superior quality, and dependable support.

Over the years, we have built lasting relationships with clients and partners, driven by our commitment to transparency and continuous improvement. We strive not only to meet expectations but to exceed them by maintaining high standards in quality, service, and professionalism.

As we continue to grow, our vision remains clear: to be a trusted name in our industry, recognized for innovation, reliability, and customer-centric solutions. We look forward to building a successful future together with our customers.

Rizz Range in Metal

(Metal Composite Panels)

Reynobarch Rizz range in MCP is designed to combine aesthetic brilliance with high performance. These panels are not just functional cladding materials—they are architectural statements that elevate the look and feel of any space, whether residential, commercial, or institutional.

Key Highlights of the Rizz Range

Luxurious Finishes:

From mirror gloss and brushed metal to stone, wood, and marble textures, the Rizz range offers a palette that mimics natural materials while delivering the durability of aluminium.

Vibrant & Custom Colours:

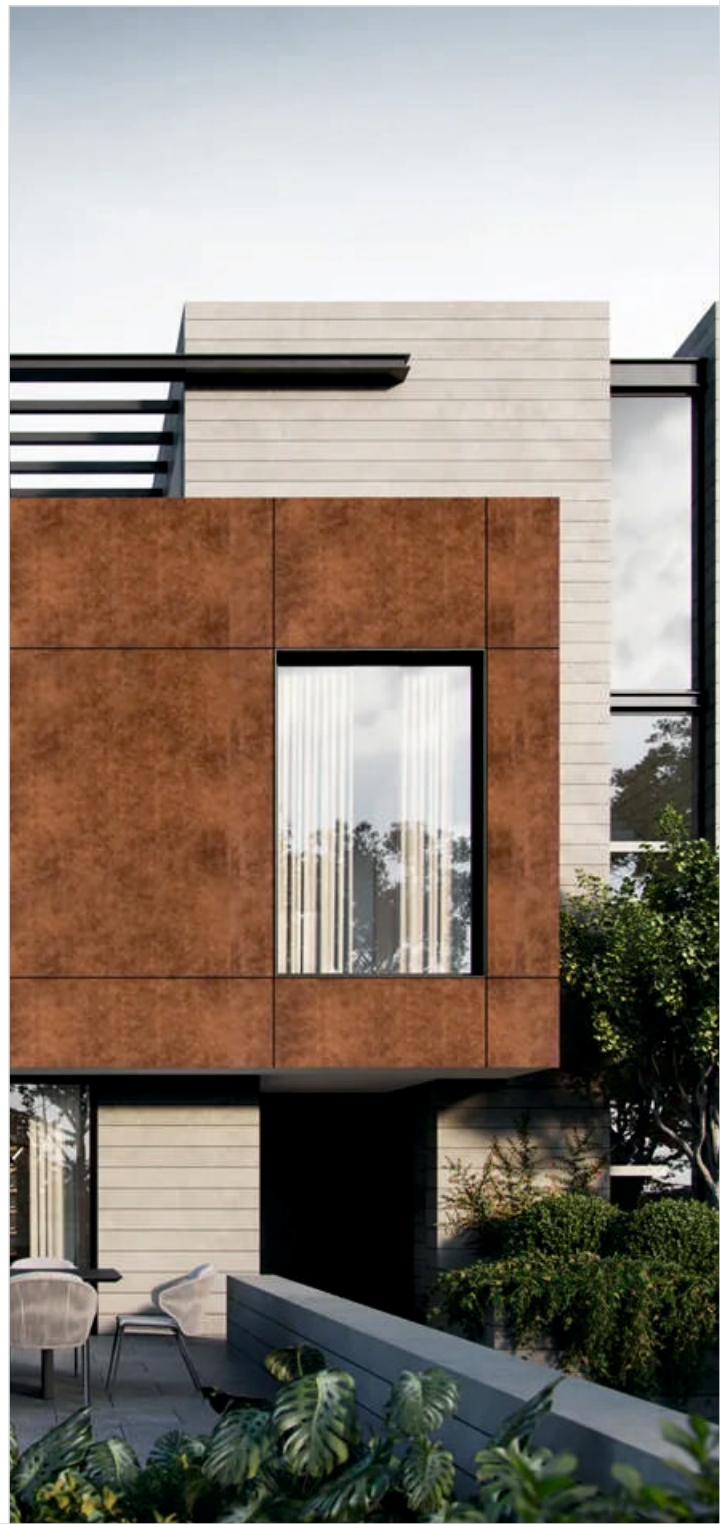

Advanced coating technology ensures rich, fade-resistant hues—perfect for bold façades or subtle, elegant designs.

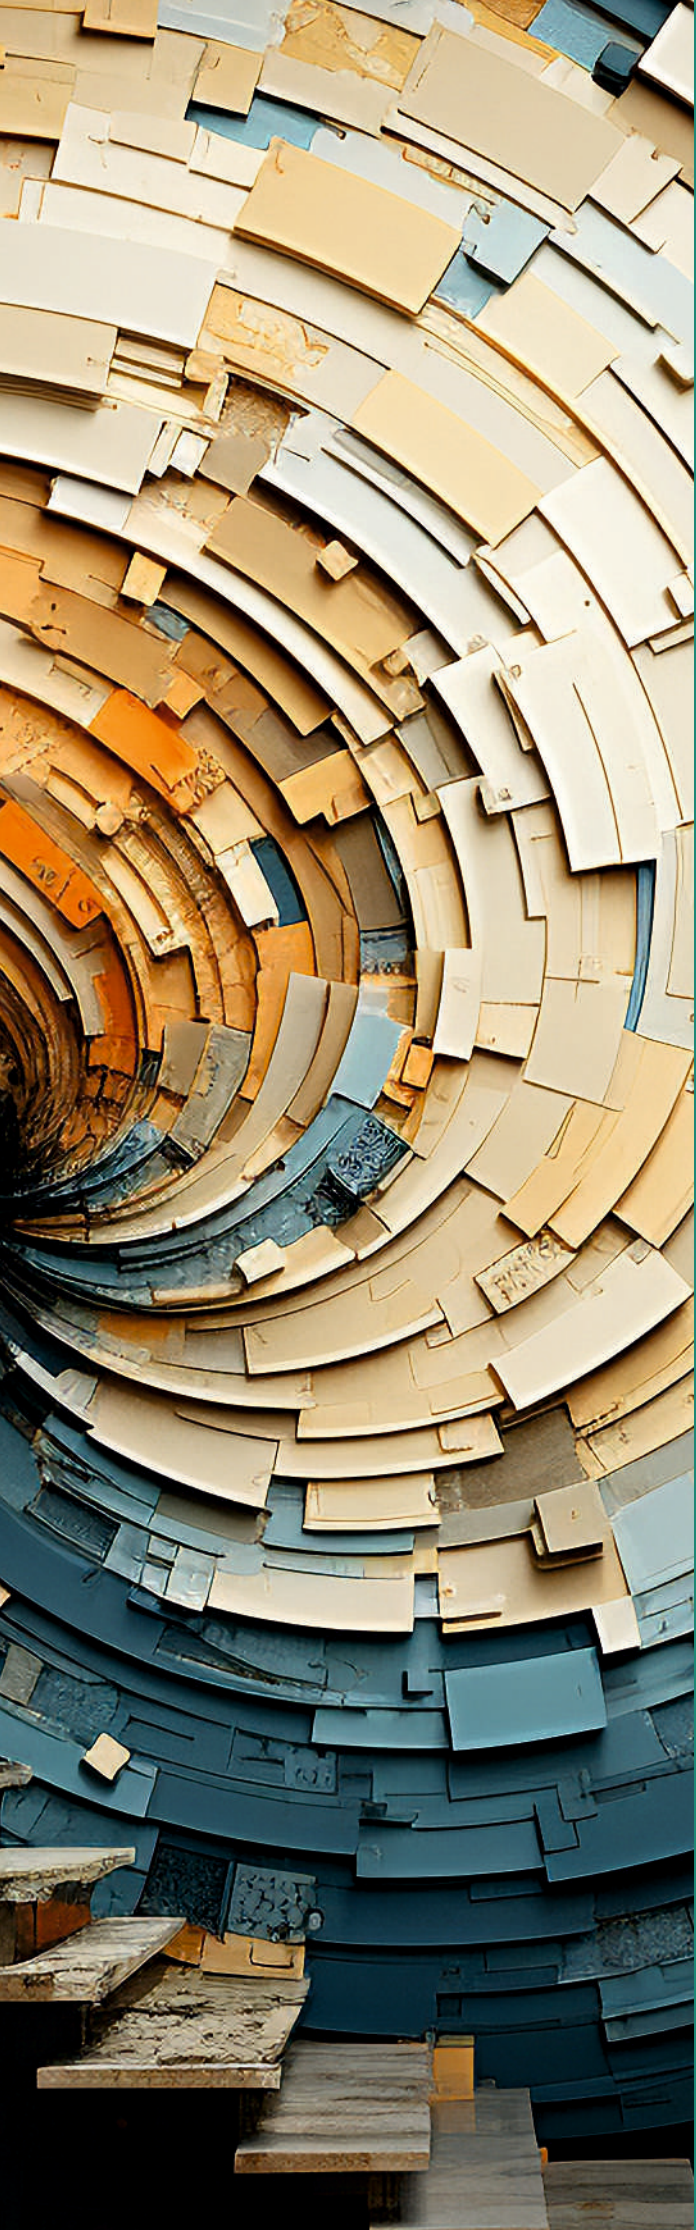

Superior Durability:

Weather-resistant, UV-stable, and corrosion-proof, making them ideal for both interior and exterior applications.

Lightweight Yet Strong:

Easy to install without compromising structural integrity.

**EXTREMELY
DURABLE**

**100%
BREATHABLE**

Real Zinc Panel

Description

The pre-weathering process is the treatment of the surface that is made of Natural Zinc. The Charcoal Zinc product is not a painted product, therefore the variations in colour between batches will give the appearance of natural stone rather than metallic.

Aluminium Honeycomb Panel

Fire Retardant

Lightweight

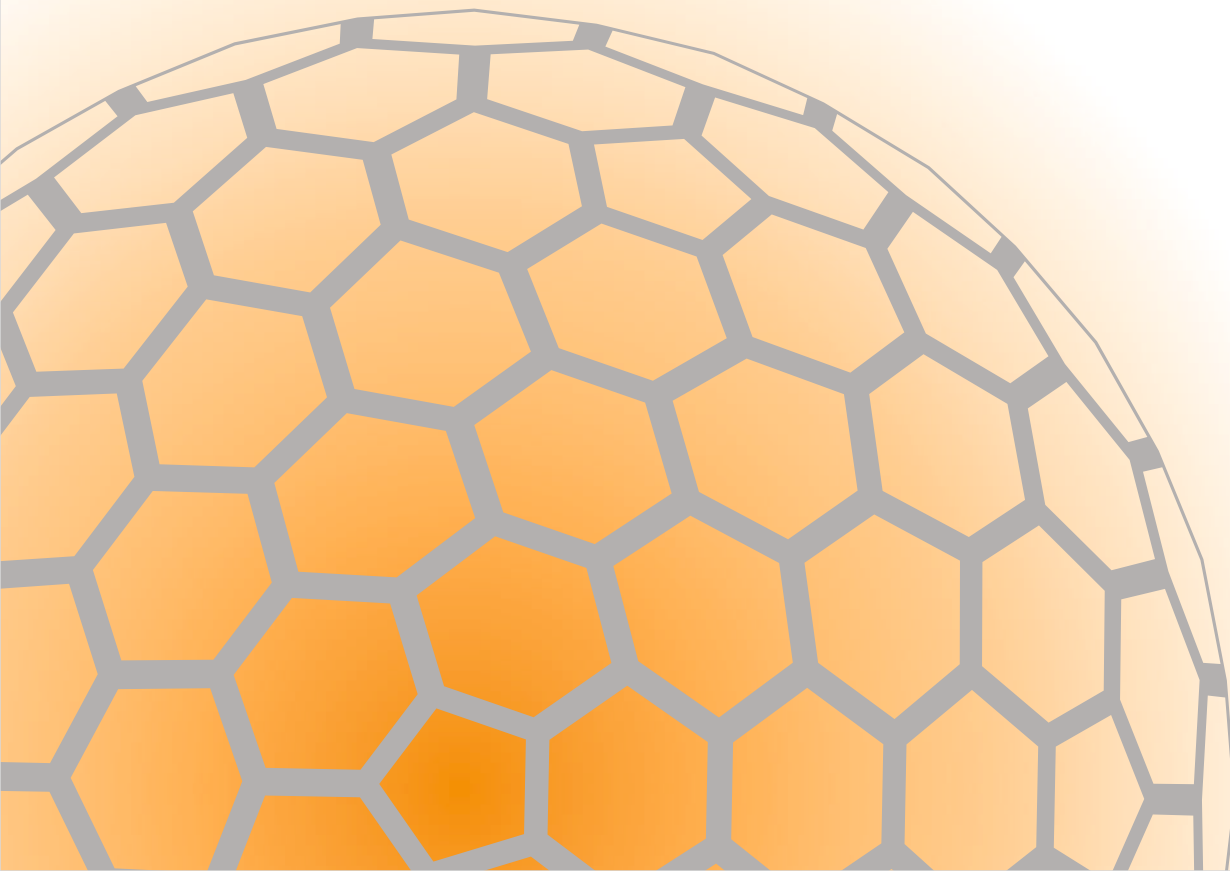

High Efficiency

100% Recyclable
& Reusable

Easy to Install

Aluminium Honeycomb Panel

The panel is non-combustible and not flammable. It has a fire rating FR Grade A2. The honeycomb sheet is hexagonal in design and prevents the rapid spread of fire.

The Honeycomb Panel has a hollow core with which the aluminium skin is connected. Because of its low density, the panel is lightweight and ideal for metro coaches, and other uses including facade application.

The Honeycomb core is hexagonal and connects to the aluminium skin at the top and bottom, creating an I-beam structure. This makes the panel strong and resistant to high-impact stress.

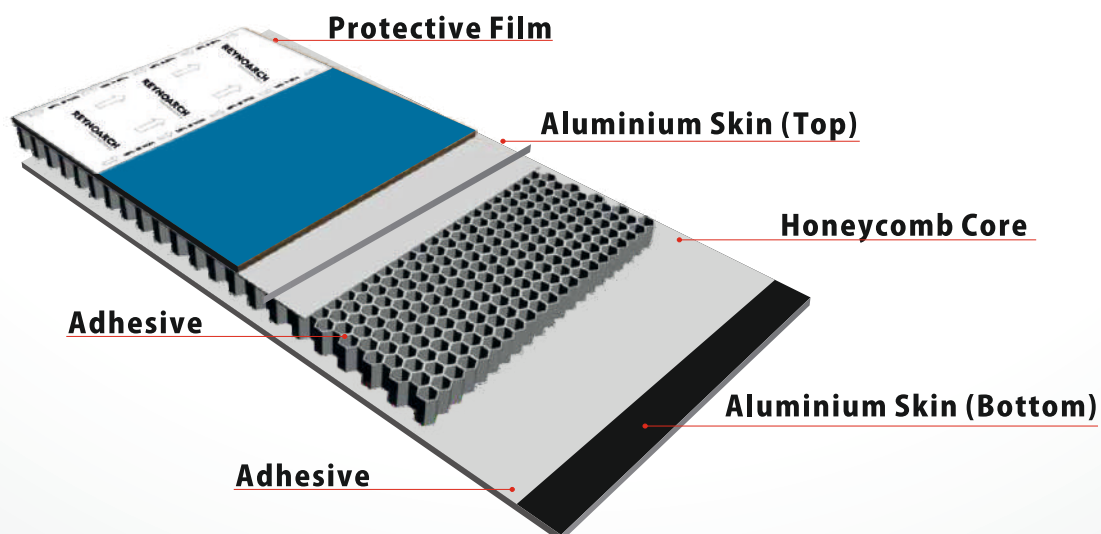

The Aluminium Honeycomb Panels alloy is 100% recyclable and reusable.

The lightweight and thin panels can be used as wall panels or for other applications. They are attached with rivets and nuts.

Due to the unique structure, where the core looks like an I-beam structure supports the skin of the panel. The panel has higher compression strength, compared to other sandwich cores.

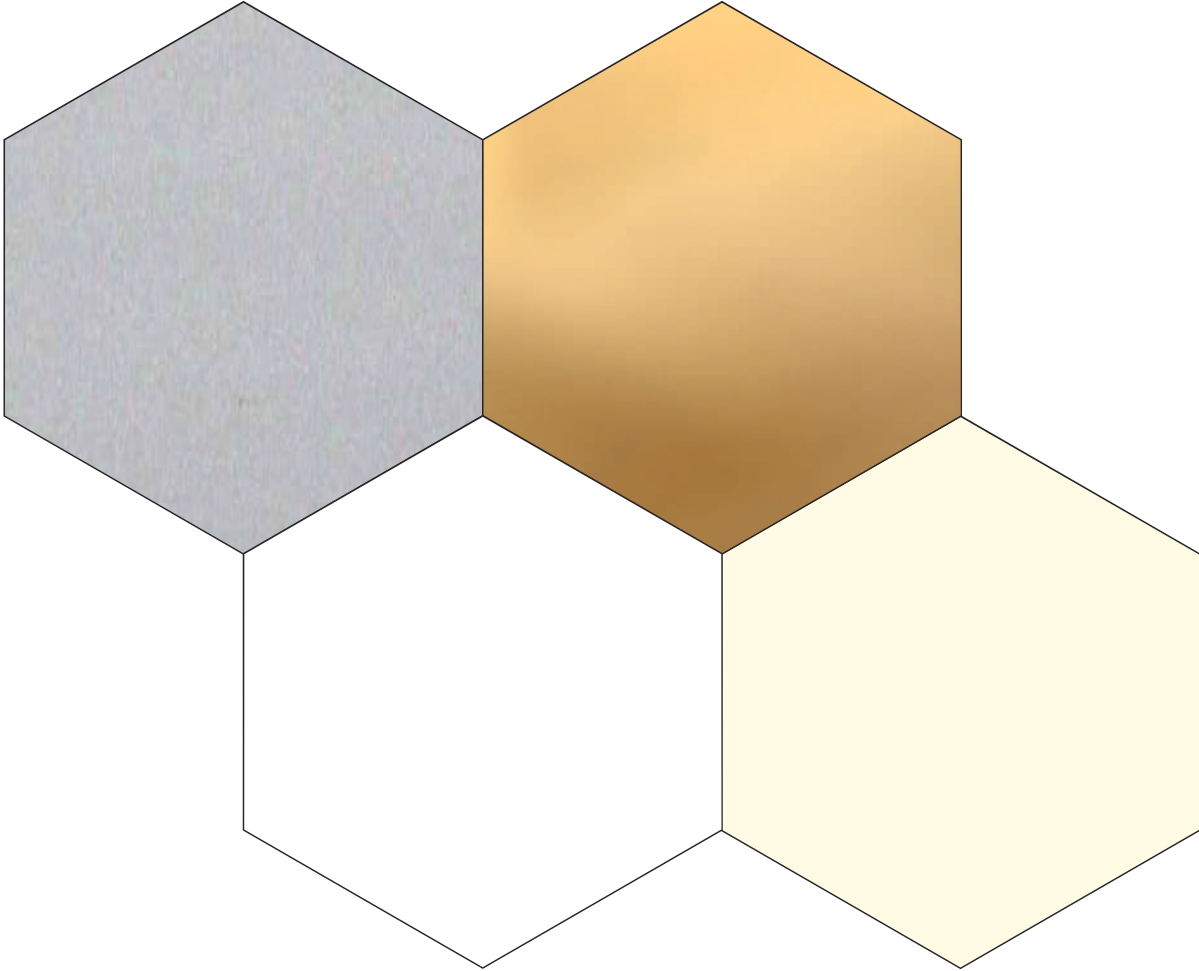

The honeycomb panels consist of a honeycomb board, which has high impact resistance and wear resistance, benefits enhancing the structural strength of the building.

We can also provide ready made panel for factory for instant installation, which save lot of time.
